leucocyte common antigen-related protein {LAR} - rat (fragment)
NyAlternate names: LAR receptor-linked tyrosine phosphatase
NyContains: protein-tyrosine-phosphatase {EC 3.1.3.48}
NyContains: protein-tyrosine-phosphatase {EC 3.1.3.48}
CyBecies: Rattus norvegicus (Norway rat)

Contains protein tyrosine phosphatase, receptor type delta, splice form A
C.Species: Mus musculus (house mouse)
C.Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 10-Sep-1999

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ਨੇ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         leukocyte antigen-related protein precursor - rat
NFAlteriate names: leukocyte common antigen homolog
NFODItains: protein-tyrosine-phosphatase (RC 3.1.3.48)
C;Species: Rattus norvegicus (Norway rat)
C;Species: Rattus norvegicus (Norway rat)
C;Accession: 546216; 52325; A1032; A33154

A Title: Cloning, bacterial expression, purification, and characterization of the cytopl

A Reference number: A41032; MUID:92011772; PMID:1918076
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A, Molecule type: mRNA
A, Residues: 1035-1072, 'S', 1074-1433,'T', 1435-1638,'N', 1640-1642,'HT', 1645-1898 <PO2>
C, Comment: Only the first of the two domains homologous with protein-tyrosine-phosphatas
C, Superfamily: leukocyte antigen-related protein; fibronectin type III repeat homology; A, Description: may be involved in the regulation of specific developmental processes in C; Superfamily: protein-tyrosine-phosphatase, receptor type zeta; carbonic anhydrase hor C; Reymords: brain; glycoprotein; phosphoric monoester hydrolase; recepi F; 6-237 Domain: protein-tyrosine-phosphatase homology <PTP1.
F;189/Active site: Cys (phosphocysteine incrmediate) #status predicted
F;195/Binding site: substrate phosphate (Arg) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  R;Guan, K.; Dixon, J.E.

protein-tyrosine-phosphatase (EC 3.1.3.48), receptor type O - mouse (fragment)
N;Alternate names: GLEPP1; glomerular epithelial protein 1
N;Contains: procein tyrosine phosphatase phi, cytosolic form; protein tyrosine phosphat C;Gectes: Mus musculus (house mouse)
C;Gate: 02-041-1996 #sequence revision 21-Feb-1997 #text_change 23-741-1999
C;Accession: 149372; 149373 [49374]
N;Pixley, F.J.; Lee, P.S. W.; Dominguez, M.G.; Einstein, D.B.; Stanley, E.R.
J. Biol. Chem. 270, 27339-27347, 1995
A;Pitle A heteromorphic protein tyrosine phosphatase, PTPphi, is regulated by CSP-1 in A;Reference number: 149372; MUID:96070847; PMID:7592997
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ascession: 14933

NyAlternate names: phosphotyrosyl phosphatase
C;Species: Orytchlagus cuniculus (domestic rabbit)
C;Date: D-Dec-1996 #sequence_revision 13-Mar-1997 #text_change 23-Jul-1999
C;Accession: S68250
R;Mu, L.W.; Baylink, D.J.; Lau, K.H.W.
Bjochen, J. 316, 515-523, 1996
A;Title: Molecular clouing and expression of a unique rabbit osteoclastic phosphotyrosy
A;Reference number: S68250; MUID:96257745; PMID:8687395
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       A:Map position: 6q

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            hypothetical protein ZK354.8 - Caenorhabditis elegans
C.Species: Genorhabditis elegans
C.Species: Genorhabditis elegans
C.Date: 15-Oct-1999 #sequence_revision 15-Oct-1999 #text_change 15-Oct-1999
C.Accession: TZ592
R.Johnson, D.; Wamsley, P.; Bradshaw, H.
Submitted to the EWBL Data Library, Pebruary 1997
A.Recription: The sequence of C. elegans cosmid ZK354.
A.Recreance number: Z20120
A.Status: preliminary; translated from GB/EMBL/DDBJ
A.Recicale type: DNA
A.Recidues: 1-483 <-JOH-
A.Recidues: 1-483 <-JOH-
A.Recidues: 1-483 <-JOH-
